N1N4 toll

## ROAD SAFETY IS BAKWENA'S PRIORITY

Bakwena Platinum Corridor Concessionaire (Pty) Ltd is a caring and responsible road authority who finances, builds, operates and maintains sustainable and safe road infrastructure. The N1 route begins in Pretoria northwards to Bela Bela off-ramp (95km) and the N4 starts in Pretoria westward to the Botswana border post (290km).

Road safety and raising awareness of its importance is one of Bakwena's most prominent tasks. Promoting road safety and providing road safety education is an integral component of the Bakwena N1N4 toll route.

Traffic is constantly monitored and trends analysed, while infrastructure is assessed and enhanced wherever necessary to increase safety. The route patrol and customer care systems form a very important part of our services not only for road users, but also for communities close to the N1N4 route.

As the owner of a long term toll concession contract, we are able to add critical value to communities beyond the scope of our commercial activities. Our consistent and sincere commitment to improving the lives of community members throughout the North West, Gauteng and parts of Limpopo provinces is at the centre of our value. Bakwena has year-round initiatives in place as part of our Road Safety initiatives, often in partnership with other road safety role players and law enforcement authorities to ensure heightened awareness is created throughout the year.

Our Road Safety Programme is aimed at raising awareness and installing the right behavior in the long term. Some of the initiatives that are geared towards learners include edutainment projects, environmental, drama, peer education and scholar patrol support. Projects aimed at improving driver behavior on the road include encouraging the use of safety-belts, sticking to the speed limits and car seats for kids.

All these initiatives are geared towards educating and creating awareness around road safety which contributes to the safety of children and adults which ultimately will reduce crashes and injuries.
